E-mail: jindrich@sarson.cz
IČO: 601 42 294

Quick overview

I'm working more than 8 in IT industry. I started as a Java developer in 2001 and worked on various projects as a developer/sw architect till 2006. I'm usually working as an independent contractor, thanks to this I have experience from bigger projects (like internet banking for Erste bank, various projects for Telefonica O2).

In 2007 I started to manage teams in Emeldi software services. First I was responsible for projects in Telefonica O2, later on for all Emeldi projects in Czech and Slovak republic (3 teams, more than 40 people). I was also responsible for team motivation, performance reviews, interviews of new developers etc. On this position in Emeldi I didn't work as a classic PM – I also worked on architecture using Enterprise architect and other tools, I recommended used technologies / tools etc.

I have strong technical skills and I'm learning new technologies permanently, mostly in Web applications development.

Industry experience: **Telecom (OSS/BSS, ordering and self-service), Banking**
Technology experience: **Java, Bea weblogic, Liferay, Oracle, .NET 3.5**
Architecture: **UML 2.0, Enterprise architect**
Team management: **management of multiple teams, agile methodology (SCRUM)**
Business experience: **pre-sales presentations, answering of RFPs**

Education

1995-2000 Palacky University, Computer science department
(Master of science)

Skills Summary (bold marked what I used during last 2 years)

Project management: **Scrum project management methodology, Microsoft Project 2007, multiple team management**

Programming Languages: **Java, .NET, Python, PL/SQL, C/C++, Objective-C**

Technologies: **Liferay, J2EE (Servlets, JSP, Struts Framework, Spring)** , Java GUI (Swing/AWT), Ruby on Rails, web based applications security (clients certificates, etc.)

Web Technologies: XML/XSL, Oracle Portal, Oracle Portal Portlets, HTML, CSS, PHP, WAP/WML, JavaScript, VBScript
RDBMS: Oracle9i, MS SQL, Postgre SQL, MySql, MS Access
Design skills: UML, Object Design, Enterprise architect, Database Design

Projects & positions

Employer: Emeldi software services
Web: <http://www.emeldi.com>

Position: Technical project manager
Duration: Oct 2008 – June 2009
Description: On this position I was responsible for all Emeldi's projects in Czech and Slovak republic. During this period Emeldi finished fix/mobile **eShop for Telefonica O2 CZ** (more than 1000 MDs project), implemented **O2 Home** product portfolio for o2 shop (900 MDs project) and finished analysis and design phase for **ePortal project for Telefonica SK**. Part of my work was also motivation of team, technical consultations to team leaders and SW architects and selection of new technologies.
On this position I was also responsible for managing of various RFPs and I was single point of contact for all Emeldi customers.
On this position I was reporting directly to company owners.

Position: Technical project manager for O2 projects
Duration: Oct 2006 – Oct 2008
Description: On this position I was responsible for Emeldi's projects in Telefonica O2 CZ. During this period, we delivered new version of **NOSB OSS/BSS system** (more than 2000 MDs), new **WebOrdering for ADSL/IPTV** (700 MDs) and new **SelfCare portal** (more than 650 MDs). During this period I managed 2 teams, each with 10 developers.

Employer: **Various smaller projects as a independent contractor**
